

## Results Website Usage

There are a number of ways in which the HKrules website enables the interrogation of past HKJC turf races. The following menu allows access to each option.

## P&L Calculator

The selection options are pretty self explanatory, in that if any values are selected or entered, then the results that are present on the HKrules database will be interrogated and the totals and calculated profit or loss displayed.

One of the selection options is the predicted speed rating for each horse in each race. This value is the same as generated for future races (not post result speed ratings). The selection here is the number of points that the top rated is clear of the second top rated.

The other selection criteria that needs a bit more explanation is the Win Price Range. This being the minimum and maximum price range that selected horses should have. zero to 999 can be entered here if no price range qualification is required. In my opinion horses with prices between 4 and 20 represent the better investment opportunities.

When Select is clicked, the totals are calculated and the qualifying results listed as below, with winners highlighted in yellow.
